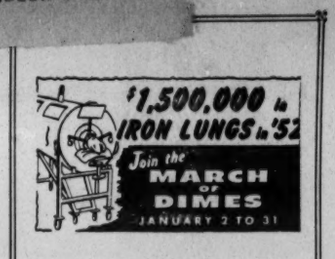
SEAL OF CONE Fabrics SERVICE



VOL. XXVI; NO. 3 GREENSBORO, NORTH CAROLINA, FRIDAY, JANUARY 16, 1953 FOUR PAGES

IN CASE OF EMERGENCY—Mrs. C. M. White shows what would happen if Miss Sybil Noah, timekeeper at Proximity Plant, had to take to one of the clean, white beds in the plant's First Aid Department.

PREVENTING ILLNESS—Mrs. H. O. Leonard, second shift nurse at White Oak Plant's spotlessly clean First Aid Department, catches Franklin Anderson's touch of "sore throat" in time to prevent anything serious. The employee model here is employed in the Weaving Department.

ON GUARD—Floyd C. Andrews, White Oak Weaving Department employee at White Oak Plant, isn't worried about the scratch on his thumb, because he took it to the First Aid Department. Mrs. Paige Holder is shown giving him first aid treatment.

Cone Memorial YMCA Board To Meet Tuesday

Marion W. Heiss, vice president of Cone Mills Corporation, will be guest speaker at the annual meeting of the board of directors of Cone Memorial YMCA next Tuesday night in the upstairs dining room of Proximity Branch at 6:30.

At this meeting, which is to be attended by the Y board members and their wives, election of officers and seven new board members will be held. C. M. Culbreth will preside over the meeting.

Chairmen of the various YMCA committees will make reports of the year's work. These committees are personnel, finance, Camp Herman, physical, boys and girls work, membership, constitution and by-laws, world service, religious education, East White Oak, house and property and canteen service.

Return From Son's Wedding In Paris

Mr. and Mrs. Sydney M. Cone, Jr., returned to Greensboro last Tuesday after attending the wedding of their son, Sydney M. Cone, III (Terry) and Michele Nadine Cahen in Paris, France, on December 22. The bridegroom's parents returned on the French liner, Liberte.

The bride is remaining with her parents, M. and Mme. Andre Cahen in Paris, during the four months her husband is in Navy Officer Candidate School, Newport, R. I. His full address is: Sydney M. Cone, III, Officer Candidate, Second Battalion Section H-I, Naval School, Newport, R. I. He returned to the states January 2.

Birth Announcement

Mr. and Mrs. Carson Rhew, 1215 Gordon Street, announce the birth of a son, Jerry Carson, on December 11 at Wesley Long Hospital. (The Textorian regrets making this announcement so late.)

Photo Of Local Fishermen Wins Place In Contest

A photo of Personnel Director Chester Arnold and son, Chester, Jr., on a fishing trip, made by Greensboro News - Record photographer Jim Wommack, this week won fourth prize in a national photographic contest. The contest featured pictures showing the American family enjoying recreation.

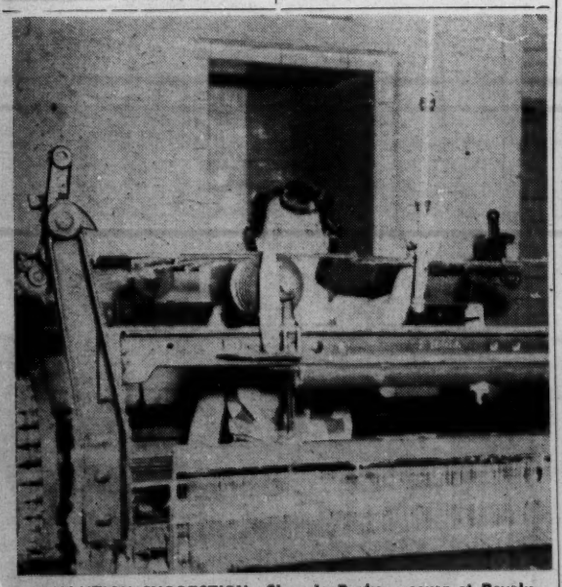
Textorian readers will recall that this picture was reprinted by this paper several months ago. It had previously run in a series of four pictures in the sports section of the Greensboro Daily News.

German Visitor Pleased With Visit

Frau Ursula von Schlabrendorff, social worker for a large bank in Frankfurt, Germany, was "overwhelmed" with her visit to Cone Mills recently, according to a letter received by The Textorian from Dr. Meta Helena Miller, Woman's College professor who accompanied her here.

Dr. Miller states that she acquired all sorts of knowledge useful for reference in her social service work.

"Everyone was so cordial at the mill and so helpful! I was more than pleased, because it gave our guest a wonderful impression of America," states Dr. Miller.



REVOLUTION SUGGESTION—Clara L. Burke, weaver at Revolution Flannel Plant, shown above, suggested that metal flags instead of filling be used as means for flagging the loom for repair. Using filling as flags often gets it dirty and this causes defects in the cloth. This mill is now using empty quills for flags.

Textile Industries Features Suggestion Of Mrs. Elaine Vick

The suggestion of Mrs. Elaine Vick, employee of Pineville Plant's Weaving Department, is featured with a story and photo in the current issue of Textile Industries magazine.

Her suggestion, as published several months ago in The Textorian, was for the hoist operator to sound a siren before starting down the aisle with a beam. Accidents are avoided through the use of her suggestion.

The article states:

"The Cone Mills Suggestion System, under which this idea was submitted, differs from most suggestion systems in that the ideas from employees, filled out on a standard form, do not go into a suggestion box but are given to the assistant overseer of the department. The assistant overseer writes his comments on the form and passes it on to the overseer. The overseer writes out his opinions and passes the form on to the superintendent, who follows the same method in passing the suggestion to the vice president.

"The vice president writes the employee a letter congratulating him or her, and a check is enclosed for acceptable suggestions. Under this system the supervisors are not by-passed."

Camera Club Will Meet On Fridays

Camera Club, which previously met on Thursday nights at 7:00, will now meet on Friday night at 7:00 at the White Oak Y. Any boy or girl who is 14 years old or older is eligible to attend this club.

The basic fundamentals in photography such as picture taking, developing, contact printing and enlarging are taught in this club under the supervision of Edward Morris.

W. B. Burke To Run For City Councilman

W. B. Burke, of Cone Mills Power Department, has announced his intention of running for City Council in the May 5 elections. The local area has not been represented on the council since C. V. Webster was a member.

Mr. Burke, a member of Sixteenth Street Baptist Church, is past noble grand of Beuna Vista Lodge of Odd Fellows. He is supreme representative from North Carolina to the Supreme Lodge of Knights of Pythias. He has been chairman of the board of trustees of the Supreme Lodge Foundation since 1936. He is also imperial representative from the state to the Imperial Palace. Mr. Burke has also been chairman of the board of directors of the Pythian Home at Clayton since 1935.

Let's help those 56,000 persons crippled by infantile paralysis last year—join the March of Dimes!

QUICK ATTENTION—Mrs. Luke Newnam, employee in Revolution Flannel Plant, gets quick treatment for a cut finger from Nurse Dorothy B. Jones in the plant's modern First Aid Department.

Officers Elected For W. O. Credit Union

Employees of White Oak Plant met Friday night, January 9, in the White Oak Y and organized the White Oak Credit Union.

Officers elected to serve a one year term are John A. Johnson, president; Henry Wrenn, vice president; Carson Rhew, secretary and treasurer. Other officers to serve on the board of directors will be Melvin Whitt and Norman Pinkelton.

On the supervisory committee will be Conrad L. Thornbro, Arthur Carroll and Clyde Wrenn. The credit committee will be Fred Hester, L. F. Paris and Orin Harris.

Employees wishing information are asked to contact any of the officers.

Sgt. Paul Brady Out Of Service

Sgt. Paul Brady is home after being separated from the service after serving 24 months in the Army. The last 12 months he was in Korea.

Sgt. Brady plans to return to work after a few weeks' rest, and will enter Duke University next fall.

REVOLUTION CHECK-UP TIME

Wednesday
9:00-Noon—Clothing Hour
1:00-3:30—Baby Clinic (combined clinic held at White Oak Y.)

Wednesday and Saturday
9:00-Noon — Library Hour (Greensboro City Library Extension.)

Saturday, Jan. 17
Church of God dinner meeting.

Cone Y Girls Beat Southern Life, 31-29

On Tuesday night, January 8, in the City Recreation Basketball League, the Cone Y girls tied Jefferson Standard by a score of 29-29.

Monday night, January 12, the Cone Y defeated the Southern Life team by a close score of 31-29. Vaughn was the high scorer for the local team with 16 points.

Both games were played at the Central Junior High School.

Eller Memorial First Half Champions

Monday night, January 19, will mark the end of the first half play in the Cone Memorial YMCA Basketball League. Eller Memorial Baptist Church has clinched the first half championship with only one loss and one game to play.

Last Friday night, Eller Memorial defeated Buffalo Presbyterian 57-51 to almost assure them of the league lead. Then on Monday night, Buffalo took it on the chin from Proximity Methodist, 36-33. Buffalo held a 14-3 first quarter lead, 19-15 at the half and 29-23 at the end of the third quarter, but Proximity Methodist pulled into the lead with less than three minutes to go at 32-31 and then went on to win, 36-33.

Tommy Russell led the winners with 10 points. Al Smith with 13 points led the losers.

In the night's other contest Eller Memorial defeated Revolution Baptist, 44-37. Patterson was high for Eller Memorial with 18 points. Swofford and Thornburg each had eight.

Cone First Aid Program Mentioned In Magazine Story

Cone Mills' 24-hour first aid service in three local plants, Proximity, Revolution and White Oak, is mentioned in the current issue of Textile Age Magazine in an article entitled, "Industrial Nurse Plays Important Role." A picture of the three Proximity Plant nurses is among the illustrations. (The photo is not included in today's layout, because the Textorian has previously published it.)

The story states, "If anyone thinks the industrial nurse is the 'forgotten woman' of the mill, they are wrong. In order to find out just how important her place actually is, a number of mills have surveyed and the only conclusion that can be drawn is that she is certainly anything but forgotten."

An industrial relations manager of a plant which operates three nursings shifts is quoted, "The conscientious industrial nurse is an aid to management and to the employee. From management's point of view she serves to promote a good industrial work climate, as well as to further good employee-employer relations. From the employees' standpoint she offers a means whereby they may communicate to management many of their problems which management might otherwise not know."

One industrial nurse is quoted in the article, "The industrial nurse works with management and employee as a team in support of the health and safety program. She must constantly increase her knowledge of the industry regarding the potential accident and health hazards encountered in the course of employment. Her motto is that a healthy employee is a safe and efficient worker."

Nine registered nurses make up the First Aid staffs of Proximity, White Oak and Revolution (Flannel) Plants. Each First Aid Department operates three shifts.

Nurses at White Oak are Mrs. Eloise Odell, first shift; Mrs. Adelaide Leonard, second shift, and Mrs. Mary Lou Holder, third shift

Revolution nurses are Mrs. Dorothy B. Jones, first shift; Mrs. Annie Dick, second shift, and Miss Lillian Tilley, third shift.

Proximity nurses are Miss Frances Holman, first shift; Mrs. C. M. White, second shift, and Miss Ruby Hinshaw, third shift.

Ping Pong Tournament

The Proximity Boy's Department ping pong tournament will start Saturday morning at 10:00. High Point Y Boy's Department is running off a similar tournament and the winners at the two Y's will play each other.

Three Cone Plants Have Around-The-Clock First Aid Nursing Service

Maintaining 24-hour first aid nursing by registered nurses is a relatively new and untried step in the majority of textile plants in North Carolina. Cone Mills has been operating such a program for some time now in three of its Greensboro plants: Revolution, White Oak and Proximity. Each of these plants has built a modern first aid department and is staffed by a registered nurse during each of the three shifts.

Three other Cone plants away from Greensboro maintain one registered nurse each. Each nurse splits her duty with all three shifts.

In the wake of the progressive step of having 24-hour nursing service in their three Greensboro plants has come a steady feeling of security among plant employees, which in turn has fostered a safety consciousness influential in reducing accidents in the plants.

First to add such a department was Revolution Division in January, 1947. For the first two or three years there was a registered nurse for first and second shifts only, with one of the overseers, who had taken Red Cross first aid courses, looking after the third shift. During the past year, a nurse has replaced the overseer, and 24-hour nursing service is in operation.

White Oak Plant built its modern first aid department in June, 1951, and in March of 1952, Proximity Plant followed suit.

All three of the first aid departments in the Cone Mills Greensboro plants are more or less along the same pattern, with reception room, nurse's office, treatment room, two bedrooms and toilets.

Neat, white clinic beds, chairs, tables, cabinets, refrigerator and sink are standard equipment.

It is to these clean, comfortable first aid stations that approximately 6,000 employees may come, if necessary, for professional first aid service at any time. The employee who should happen to be injured at his work at 3:00 a.m. gets just as much care as the one who might be hurt at 3:00 p.m., and so around the clock, assuring prompt attention to all injuries, regardless of how minor.

Through knowing about such a set-up, employees at Cone Mills work more at ease and more happily, because they realize that their company cares about their physical well-being and that if through individual carelessness they should have accidents, they will not have to lose valuable time because of lack of proper attention.

Value of such a program to the individual employee and to the company is actually inestimable, because much of the virtue in such a program is long range in consequence. It is a result of the entire industrial nursing program and ultimately the industrial relations program.

However, a definite saving in man-hours and reduced accident costs due to professional treatment of injuries at the right time can be estimated.

These values all result in improved quality of work and in better employee-employer relations in general.

Success of operating a first aid room does not depend entirely upon its equipment but on the knowledge and understanding of the industrial nurse concerning her own work and the work of the mill employees who come to her as first aid patients. Her natural liking for people should be fortified with a genuine desire to improve accident conditions in the plant. Her advice and counsel on safety problems are important to the employees. The Cone Mills industrial nurse's job is not only one of "binding up wounds" but one of education as well.

Club Will Have Dance

Proximity Teen Co-ed Club will sponsor a square dance Friday, February 6, at the Proximity YMCA. The club will furnish its own talent to provide the music.

Brunswick Stew Sale

Revolution Community Club is beginning its sale of brunswick stew tickets for next Friday's project. Tickets may be purchased from club members from today until the day the stew is made. Purchasers may get the stew between noon and 5:00 next Friday at Revolution Apartments.

Rankin Club To Meet Tuesday, Jan. 20

The Rankin teen-age club held its first meeting last Tuesday night at 7:00. This meeting was attended by boys only. The plans are for a co-ed teen age club, and any teen age girl or boy is invited to attend this meeting next Tuesday night at 7:30 in the White Oak Y Building.

Help some unfortunate child to walk again—join the March of Dimes!

More For Our Money

President Truman's proposed budget does not bring a cheerful message to the American people. Even that budget, as high as it appears, would mean a further increase in the national debt as the anticipated collections by the government would not equal the amount of the budget.

The budget which will be proposed by General Eisenhower will also not sound good even though it will no doubt be considerably less than the proposal by President Truman.

The American people desire and actually need a tax reduction. In fact, we feel that it can be truly said that the economy of the country will suffer no little unless a greater incentive to earn by investing money is restored. There can be no better way to increase this incentive than by more net benefit from the dollar earned, whether it be the wage earner or the investor.

It has been reported that General Eisenhower is determined to make the governmental expenditures balance with the government income. We subscribe to that policy as too much of a financial yoke has already been placed upon future generations by our national debt. The theory that it makes no difference if the government operates in the red since "we are borrowing from ourselves" does not add up. Even if the debt is never repaid, an analysis will reveal that the government has to pay interest on the money it borrows, and we all pay that interest with taxes.

No thinking American feels that we should not prepare to defend ourselves. Cooperation with the non-communistic nations is also considered as a proper policy for this government. The spending of funds by the government to function adequately as this government should function is accepted as sound policy.

We further must realize that the governmental expenditures will of necessity have to be large. It is believed, however, that much can be done to accomplish what is necessary both at home and abroad and still economize. We believe that the new administration is not going to be foolhardy and neglect necessary activity. On the other hand, it is our guess that the administration will more carefully analyze its expenditures and will dedicate itself to a program of getting more for our money. This will mean that an attempt will be made to cut out waste and inefficiency in this country and to force foreign countries to more accurately account for the use of the money we furnish them. Such a program is bound to bring about an appreciable reduction in spending.

It may be that some foreign countries would resent the type of accounting that we should definitely demand of them. If we are to continue to make contributions for their use, we should be assured that they themselves are going all out to help themselves.

A better control of spending is a partial answer to the stupendous financial problem facing this nation. We should be sure we are getting full value for the money spent by the government both in the United States and overseas.

LISTEN AMERICANS!

... by George S. Benson
President of Harding College

Much has been said and written in recent months about the reduction of a federal government budget that has now reached $70 billion a year. As a candidate, President-elect Eisenhower reportedly said the budget could be cut almost in half within a few years. Some authorities on public finance have suggested a general reduction at a rate of $10 billion a year. Dr. Harley L. Lutz, professor emeritus of public finance, Princeton University, is specific.

In a lecture at Harding College, Dr. Lutz recommended basic changes in federal and state governmental responsibilities, and changes also in the allocation of tax sources. Under his carefully detailed plan a federal budget goal of $51.7 billion would be possible for the fiscal year 1955-56, and his tax plan for that year would bring in $53.8 billion, providing a $2 billion margin for debt reduction.

He recommends that all welfare services be handled by the states; likewise education, highways and public health service. The federal government now gets $800 million from gasoline and oil tax and puts only $400 million back into the highways through grants, thus bleeding the states of $400 million in highway money.

The need for more state school revenue could be met, Dr. Lutz points out, by giving the states the present federal taxes on admissions, dues and initiation fees, safety boxes, bowling alleys, coin devices, and stamp taxes—which produce $500 million a year. He thinks the Old Age and Survivors Insurance (old age pension) program can best be handled by the federal government, though he contends it should be placed on a pay-as-you-go basis. All other welfare services should, he thinks, be handled by the states.

"By leaving enough of the people's income at home," he says, "the several states can provide whatever may be needed out of their own funds."

The key change in his tax revision recommendation provides for cutting down considerably on the federal income tax rate, so the states can have this source for their local needs; and the obtaining of a major portion of the federal taxes through a manufacturers' excise tax, with food and food products excepted, and with alcoholic beverages and tobacco taxed separately. The details of the Lutz plan may be found in his book, **A Platform for the American Way**, Appleton-Century-Croft. It's good reading for all taxpayers.

Thoughts On The Business Of Life

Surely there must be some place where the great minds of Shelley, Homer and Spinoza go after death. The denial of immortality does not square with intelligence. Adolph S. Ochs, shortly before his death, said that he believed that he was more than an animal and that he did not believe that this life is the end. Our bodies change and in the end crumble. It is a house of clay. But inside there is a spiritual duplicate. As we have borne the image of the earthly, so shall we bear the image of the heavenly.—Malcolm James McLeod, D.D.

The most agreeable thing in life is worthy accomplishment. It is not possible that the idle tramp is as contented as the farmers along the road who own their own farms, and whose credit is good at the bank in town. When the tramps get together at night, they abuse the farmers, but do not get as much satisfaction out of it as do the farmers who abuse the tramps. The sounder your argument, the more satisfaction you get out of it.—Ed Howe

The working man must not lose sight of the fact that the principle of brotherhood is applicable to all men, regardless of capital or poverty.—John Lewis Zacker, D.D.

Getting an idea should be like sitting down on a pin; it should make you jump up and do something.—E. C. Simpson

There are two worlds: the world that we can measure with line and rule, and the world that we feel with our hearts and imagination.—Leigh Hunt

I rejoice that intelligence rules, that there are thousands and tens of thousands of wide-awake men and women, rich in the understanding of life's meaning, plodding along, singing as they go, doing their work, whether it be uphill or down, with an invincible determination, a simple modesty and a cheerfulness that radiates joy and happiness to all within reach of their influence.—Louis A. Stremple

Speeches that are measured by the hour will die with the hour.—Thomas Jefferson

The real problem with which modern government has to deal is how to protect the citizen against the encroachment upon his rights and liberties by his own government, how to save him from the repressive schemes born of the egotism of public office.—William E. Borah

Everyone comes between men's souls and God, either as a brick wall or as a bridge Either you are leading men to God or you are driving them away.—Canon Lindsay Dewar, D.D.

Pythian Echoes

by R. Cole Lee

Methinks the first item that should be mentioned is the Pythian Paper Drive to be held this Sunday at 1:00 pm. The many good families of our vicinities have been very cooperative in months past in placing their old newspapers and magazines on the sidewalks and, believe me, we are most grateful. Your goodness has helped the Lodge to assist generously in helping many worthy projects, especially the folks not so blessed with many of the good things of life which we enjoy. This Sunday we are asking that you again lend a helping hand, for in so doing, you will most certainly aid others. Does the word OTHERS mean anything to you? It did to the poet, so read just a couple of the stanzas:

"Help me in all the work I do
To ever be sincere and true,
And know that all I do for You,
Must needs be done for—others.

"Let 'self' be crucified and slain,
And buried deep and all in vain
May efforts be to rise again
Unless to live for others."

For others then, we ask your cooperation!

It has been officially announced that the evening for the 89th anniversary banquet of the Pythian Order will be held February 21 at the White Oak Y.M.C.A. This banquet will serve a two-fold purpose—to commemorate the founding of the Order on February 19th, 1864, and to give special recognition to the entire Cone family for their outstanding contributions for the betterment of mankind, regardless of race or creed, at home and abroad.

Folks, I am happy to report that Pythian Starr Davis is back at home and is recuperating nicely. On the other hand there is a note of sadness which I must inject as I call your attention again to the fact that Pythian C. C. Whitt's daughter, Mrs. Martha Jean Ferrington, still remains in a very serious condition. Brother Don Cox, so well acquainted by many for his simplicity and earnestness of life and for his love of all people, has undergone a very critical operation at Wesley Long. In this hour of great anxiety and restlessness, we join their immediate loved ones and lift them in our humble prayer to the ever caressing and gentle hands of Him who alone can administer when all other sources fail. Charles F. Lummis once said: "I am bigger than anything that can happen to me. All these things, sorrow, misfortune and suffering, are outside my door. I am in the house and I have the key. That key is prayer."

For the special Shelton Roper Class to be held in Salisbury, January 24th, the local Lodge is making a special inducement to any in-law of a member by allowing him to join the Lodge at a special rate. Thus any son-in-law, brother-in-law, father-in-law, step-son or any other close relative to any member of the Lodge who wishes to be affiliated with an Order as universally known for its service to mankind as the Pythian Order, here is an excellent chance. For these special rates I suggest that you contact any member of the Lodge or better still, the member of your family now affiliated. You will be amazed at the wonderful opportunity to become a Pythian. All males not closely related to any member must apply for membership at the regular price of initiation.

Mrs. L. G. Newton, Misses Marjorie and Eleanor Newton and Mr. Herman Johnson, Jr., visited 11 days in Florida during the Christmas holidays, going as far south as Miami.

Mr. T. R. Cox of Rockingham visited his nieces, Mrs. O. J. Reed of Revolution and Mrs. E. R. Patterson of Proximity, last week. He was accompanied home Sunday by Mrs. Reed, Miss Sue Brown and Mr. Harry Patterson, who returned in the evening.

Mr. and Mrs. H. W. Laughlin, and Mrs. Bertha Laughlin of Randleman, Mrs. Johnnie Powell of Neese, Mrs. Harold Laughlin of Cedar Fall, and Mr. Clarence Carter of Camp Lejeune were recent visitors with their nephew and family, Mr. and Mrs. P. C. Laughlin.

Mrs. Lowell T. Steele spent the week end in Lincolnton with her daughter, Miss Virginia Steele.

Pineville News

by Lillie Mae Brewer

The Ladies Missionary Circle of the Stough Memorial Baptist Church held its monthly meeting at the home of Mrs. Thomas Grace. Mrs. Arlene James was in charge of the program. The ladies had a surprise birthday party for Mrs. Grace, who has been sick for some time. She received many beautiful gifts.

Mr. and Mrs. James A. McCoy have a new son, Michael Wayne, born December 31, at Memorial Hospital, Charlotte.

Mrs. Flora Ferguson has returned home after being a patient in Charlotte Memorial Hospital for several days. Her condition has improved.

Brice Earnhardt has returned to work after being sick for several days.

William Cook of the Slasher Department has been very sick for several days.

Minneola News

by Miss Opal Isley

Mrs. O. W. Wyrick, who has been a patient at St. Leo's Hospital for several days, has returned home.

Donald Overman, a student at East Carolina College, Greenville, spent the week end with his wife and parents, Mr. and Mrs. Clyde Overman.

Mr. and Mrs. Walter Cuthbertson spent Saturday in Greensboro visiting Mrs. I. S. Cuthbertson.

Mr. and Mrs. Harold Cates and family, Burlington, spent Sunday with Mrs. Floyd May and Miss Dorothy Cates.

T. G. Evans, of the U. S Navy in Virginia, spent the week end with his family.

Science Answers The Epidemic

While polio was striking 55,000 Americans in 1952, the same number was to figure prominently in MARCH OF DIMES research seeking a control for infantile paralysis. Late in the year, announcement was made of preliminary findings on the first human trials of gamma globulin, a blood fraction which had effectively immunized monkeys against paralytic polio. The first trials of the substance on human beings were conducted with 55,000 children living in hard-hit polio areas at Provo, Utah, Houston, Texas and Sioux City, Iowa. The tests, conducted by scientists from the University of Pittsburgh, were financed by the MARCH OF DIMES.

The preliminary findings demonstrated conclusively that gamma globulin is effective in giving human beings some degree of temporary immunity to the disease. This was a tremendous step toward polio control, although it did not mean that the end of the road had been reached. Most important was the realization that, for the first time, science had been able to check the course of paralytic polio in the human body. As he struggled toward his ultimate goal of a lasting preventive and control, man knew that the end of the road lay within his reach. MARCH OF DIMES research was pointing the way.

FINISHING DEPT. PARTY—Women in the Finishing Department of White Oak Plant had their third annual Christmas party on Decembr 22 in the White Oak YMCA. Gifts were exchanged by the 28 present. Mrs. Hazel Owen and Mrs. Zonie Hussey led in games. The group sent flowers to Mrs. Louise Clark's mother, Mrs. Jennings.

New Dyeing Machine Dyes Faster; May Cut Price Of Clothing

NEW YORK — A new dyeing machine, that dyes cloth faster, uses less dye and takes up less space, promises eventually to make material and clothing cheaper for consumers, Textile World, McGraw-Hill publication, says.

Advantages claimed for the machine are versatility in the type of dyestuffs used, flexibility so it can be used for short runs, and better and speedier diffusion of dye solutions throughout the fabric.

The machine can operate at any speed between 20 and 120 yards a minute, depending on the type of fabric and class of dyestuff used, the magazine reports. Fabrics dyed on the machine so far have included cotton, wool, rayon, acetate, nylon. orlon, and Dacron.

Conventional machines move cloth more or less at random through a low-concentration dyebath and dye particles affix themselves slowly to fibers. The new machine directs dye molecules in high concentrations at high speeds into the fabric and directly into the fibers in a sort of shotgun technique.

The machine is still in the development stage, but full-size models are being built. Hussong-Walker-Davis, Philadelphia, is building the machine. Boyce C. Bond is the inventor.

No January Meeting

Proximity Parent-Teacher Association will not meet during the month of January. Next meeting will be on Tuesday, February 10.

Cotton Still "King" Of Industrial Fibers

WEST POINT, Ga. — Although dethroned as monarch of southern agriculture, cotton is still "king" of all industrially-used fibers.

This first-place recognition is accorded the "fleecy white staple" in an attractive pamphlet, "Modern Textiles for Industry," published by Wellington Sears Company, one of the foremost authorities in the nation with an experience of more than 100 years in the textile field.

According to this authority, cotton is still "king" of the fibers partly for economic reasons, such as: continuity of supply, widespread availability due to enormous production, its relatively low cost, and its outstanding physical properties."

"Cotton fibers," states the referred-to pamphlet, "also have a natural twist which provides excellent spinning qualities resulting in strong yarns. An extremely durable fiber with god stability against stretching, it is highly resistant to degradation by heat, and has good 'bulking' and insulating qualities.

"High wet strength, together with absorbency which causes the fiber to swell when wet, results in excellent fabric performance under moist conditions, to finishing processes providing water-repellency, dimensional stability, resistance to mildew and flame, improved electrical qualities and other special requirements."

In setting forth the strong points of cotton's competitor in the field of fibers, or filaments—the synthetics—"Modern Textiles for Industry" states in part:

"Rayon . . . offers two primary advantages: first, being scientifically manufactured, its uniformity may be precisely controlled at all stages of production; and, second, its most is relatively stable, with prospects for eventual decreases as production grows."

"Acetate . . . has a high delectic strength. Even more significant is a high-tenacity filament yarn, 'Fortisan,' developed from acetate. The exceptional tensile strength of stretch resistance of Fortisan make it useful for military applications such as flare parachutes, and also in varnished insulation and rubber and plastic combinations."

"Nylon . . . has very high tenacity in both dry and wet conditions; excellent resistance to abrasion and flexing; toughness and elasticity; resistance to heat and many chemicals; and excellent electrical qualities."

"Acrylic Fibers, of unusual interest, particularly in engineering problems involving electrical conditions or the handling of strong acids . . . having low moisture absorption, and dimensionally stable, are non-conductors of electricity and show good resistance to many chemicals and destructive organisms."

"Orlon, first of the 100 per cent acrylics, is light, strong, resilient, and has outstanding resistance to ultra-violet rays, atmospheric effects, and mildew and bacteria. Dynel, of vinyl and acrylic origin, will not support combustion; and while somewhat sensitive to heat, resists strong alkalies as well as acids, and is suitable for chemical resisting work clothing, filter cloth, insulation, hosiery dye nets, and other uses."

"Polyester Fiber . . . is water repellent, quick-drying, dimensionally stable and dielectric; has good strength, flex life and shape retention; resists abrasion, heat and many chemicals. Dracon shows promise for safety footwear and clothing, plastic laminates and rubberized products."

"Fibrous Glass is incombustible, durable and non-absorbent, with high tensile strength and resistance to weathering, heat and many chemicals."

"Vinyl Fibre, Saran, is characterized by toughness, flexibility and resistance to chemicals, fire and water."

"Protein Fiber, Cicara, a woollike protein stable fiber with considerable heat and chemical resistance, is widely used as a blending fiber in apparel fabrics and also has industrial possibilities."

Ever alert to market demands, West Point Manufacturing Company and its affiliates, with the cooperation of its research division and selling agency, while specializing in the manufacture of cotton textiles, is engaged also in the processing of all these synthetic fabrics.

THE NATIONAL FOUNDATION FOR INFANTILE PARALYSIS · FRANKLIN D. ROOSEVELT, FOUNDER

Alabama Girl Is Cotton Maid

MEMPHIS, TENN. — Sparkling Alice Corr, of Selma, Ala., is the 1953 Maid of Cotton by virtue of her victory over 21 other Cotton Belt beauties in the annual contest here Dec. 30.

The radiant brownette, a sophomore at the University of Alabama, is the first Alabama girl ever to be selected to represent the American cotton industry as its fashion and goodwill ambassadress. Named as first alternate is vivacious Jo Ann Turner of Jazoo City, Miss., a junior at the University of Mississippi. Second alternate is charming Bobette Bentley of Los Angeles, Calif., a student at the University of Southern California.

The new Maid of Cotton is 19 years old. A green-eyed beauty just over 5 feet 7 inches tall, she was Alabama's official state Maid of Cotton in the annual competition. Before attending the University, Alice was a student at Randolph-Macon Woman's College at Lynchburg, Va.

The youngest of seven children, Alice is the daughter of Mr. and Mrs. Mark S. Corr of Selma. Mr. Corr is a manufacturer's agent for lumber and lumber products.

When her selection was announced, the pretty Alabamian was wearing a glamorous evening gown in petal pink Everglaze cotton designed by Ceil Chapman.

The 1953 Maid of Cotton begins the New Year with a flight to New York City on Jan. 2. There she will spend a month in preparation for her seven-month international fashion and goodwill tour.

In New York she will be fitted for her stunning all-cotton wardrobe designed by 30 noted American fashionists and she will undergo preparatory training for her new role as King Cotton's emissary. She will be featured on network radio and television programs and will be presented for the first time in a showing of her all-cotton wardrobe before the Association of American Soap and Glycerin Producers.

Remaining in the competition with the Maid and her two alternates at the final elimination were Christelle Lois Taylor, Alma, Ga., and Marlin Jones, Germantown, Tenn.

Earlier the contestants had been eliminated to ten. Included in the top ten candidates were: Emily Wood Coxe, Mont Clare, S. C.; Sidney Erwin, Charlotte, N. C.; Ruthie Garst, Bradenton, Fla.; Mary Lipscomb, Houston, Texas; and Patricia Ann Torn, Taylor, Texas.

The 1953 Maid of Cotton is the fifteenth to represent the cotton industry as its official goodwill and fashion courier. She will visit Paris and three other European capitals, Latin America, Canada, and 30 major U. S. cities to carry King Cotton's 1953 fashion and goodwill message.

Maid Alice has won many honors throughout her high school and college career. At the University, she is a member of STAB, Kappa Delta, the Dramatic Club, and other campus activity groups. She was named yearbook beauty, "Co-ed of the Week" and University magazine cover girl. Her special interests are music, art, dramatics, and sports.

The seven months of travel ahead hold many thrills in store

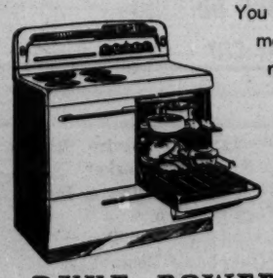
Why Cook Electrically?
Why, here are only a few of the many reasons why:

it's CLEAN
An Electric Range cooks without smoke or soot to blacken pots or pans, walls or woodwork.

it's COOL
An Electric Range gives you surface cooking without hot flames and fumes oven cooking with no heat escaping through all-around insulation

it's AUTOMATIC
An Electric Range has accurate automatic controls for time and temperature—to cook your meals while no one looks to lengthen your leisure

it's HEALTHFUL
The newest Electric Range heats up faster—to cook your foods with a maximum of speed and efficiency . . . with a minimum of vitamin evaporation.



You yourself can discover more reasons for better meals ELECTRICALLY!
Choose Your AUTOMATIC ELECTRIC Range Now At Your Electrical Dealer's or On Our Display Floor.

Edna Plant News

by Elizabeth Harviel

Mr. and Mrs. Jack Roark are proud to announce the birth of a son, January 4, at the Annie Penn Memorial Hospital. Mr. Roark is a doffer on 2nd shift Spinning. Mrs. Rhoda McAllister, weaver on 2nd shift, is the grandmother.

The employees of Edna Plant wish to extend their sympathy to the family of Mr. Bently Yeatts in their hour of sorrow caused by the death of their son, Carl Lindsey.

Gospel Sing To Be Sunday At Bessemer

Guilford County Gospel Group Singing Convention will be held at Bessemer High School on Sunday afternoon, January 18, at 2:00.

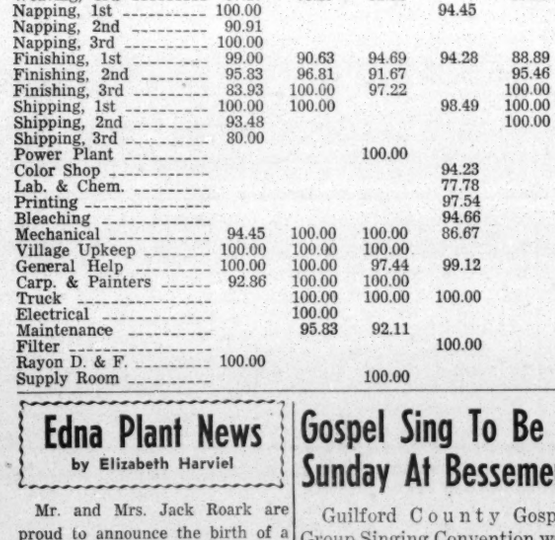
Special guest singers will be the Rythmaires of Thomasville and the Friendly Four Quartet of Mt. Airy.

In addition there will be many other local and out-of-town singers.

MARCH OF DIMES

FIGHT INFANTILE PARALYSIS

JANUARY 2-31



Famous Swimmer To Perform Here Jan. 20

"Corky," the 300 pound "human cork," internationally famous swimmer and water comedian, will perform here at White Oak YMCA on Tuesday, January 20, at 4:30 and 8:00 p.m. The public is invited to see this giant of aquatic circles in action.

Ten and 20c admission will be charged spectators. The program is to be sponsored by Cone Memorial YMCA Physical Department.

The exhibition will feature the sensational "Leap for Life" when "Corky" is tied to a weighted chair in a sitting position and hurled head first into the water, attempting to escape under water in fifteen seconds, bringing the chair up in his mouth. (He has been injured over 200 times in performing this feat.) His latest injury was at Jantzen Beach Park at Portland, Oregon. The big fellow will also present many other stunts including his world famous "Seven Glass Balancing Trick" . . . and eating, reading and smoking under water . . . introducing three new swimming strokes and if time permits he may box four fellows in the water at one time (a knock under is a knock out).

"Corky" has performed with all of the great water shows, including the New York and San Francisco World Fairs and Billy Rose "Aquacades," and the Canadian National Exhibition. He is billed as a top rate comedian, but he is best known for his 225 mile non-stop swim down the Mississippi River in 96 hours, and has made over 44 endurance and long distance swims.

The champion and his stooges should attract the children and adults as well. It's a program packed with action and new stunts and plenty of good clean comedy. "Corky" has as his slogan, "Let's Keep 'Em Swimming." Public is invited to see this attraction and a large crowd is anticipated.

Fire Prevention Good Business

Fire prevention is still good business, even if you think it has never helped you to avoid a costly home fire.

In a study of proper preventive measures to be taken for avoiding fires, the Institute for Safer Living of the American Mutual Liability Insurance Company has found that a number of these measures lead to direct dollars and cents savings in other ways while helping to insure the home against property loss, injury, and loss of life. These measures also contribute much toward more comfortable and enjoyable living.

One example given by the Institute is faulty heating equipment. Defective stoves and furnaces are one of the leading causes of home fires. By repairing or correcting heating units, you not only eliminate the threat of fire, but also begin to save money on your fuel bills, and enjoy more warmth and comfort. Repairing defective chimneys is another way to get better heat and save on fuel, at the same time banishing the fire menace.

March Of Dimes Here Next Week

Employees of Cone Mills' Greensboro plants will be given an opportunity to contribute to the March of Dimes next week. Anyone wishing to make a contribution to the fund for infantile paralysis may do so through his or her overseer in the plants.

Many Greensboro people have already benefitted from the March of Dimes. Location of the Carolina Convalescent Hospital near Greensboro has brought the facts concerning this dread disease more closely to local people.

By now, everyone realizes the tremendous cost in treatment and rehabilitation of patients. So that no patient will have to be neglected because of lack of money, the American people are asked to contribute as generously as possible to a fund which anyone might have to call on in the days ahead.

Cotton Leaders To Meet At Dallas

The National Cotton Council, central organization of the American cotton industry, will hold its fifteenth annual meeting at Dallas, Texas, Jan. 26-27, Harold A. Young, council president has announced.

The cotton leader said that more than 700 representatives of the industry and allied groups are expected to attend the meeting. Industry-wide programs for cotton in the field of research and promotion for 1953 will be planned by the delegates.

The Cotton Council held its first meeting in 1939 at Dallas, Mr. Young said, pointing out the striking change in cotton's competitive position since the initial conference.

Health For All

PNEUMONIA

A severe cold with a fever is always dangerous. If it is accompanied by shaking chills, pain in the chest or side, difficulty in breathing, or blood-tinged sputum, it is probably pneumonia. Call the doctor at once.

Any delay in calling the doctor is an unnecessary risk. It delays hs diagnosis, postpones his beginning proper treatment, may even cost the patient his life. In this day of effective serums and drugs, most of those who die of pneumonia are people who neglected a heavy cold that hung on.

Pneumonia is an acute inflammation of the lungs, which interferes with the lung's normal function of supply oxygen to the blood stream. There are various types of pneumonia, caused by different pneumonia germs, the most common of which are the pneumococci. It is spread from person to person, by those with the disease or by apparently healthy persons carrying the germs in mouth or throat.

Because pneumonia is communicable, the first step, after calling the doctor, is to get the patient into bed in a room by himself. Next, while waiting for the doctor, get, in a clean bottle or jar, a specimen of sputum coughed up from the chest. The doctor may want this specimen for examination immediately. If hospitalization is not required, ask the doctor to help you get the best nursing service available. Guard against the spread of the germs by taking all possible sanitary precautions.

Antipneumococcus serums and drugs like penicillin, aureomycin, and the "sulfa drugs" are effective used in treating pneumonia. Used promptly, they have saved many lives. Doctors warn, however, that pneumonia develops rapidly and that these scientific advances can have their maximum effect only when the doctor is given a chance to use them early in the course of the disease.

There is not yet an accepted vaccine for the prevention of pneumonia. The best protection lies in individual good health with its natural resistance to infection.

FORMER EMPLOYEE — Samuel E. Adams, above, son of Mr. and Mrs. William Adams, employees of Eno Plant, Hillsboro, spent Christmas holidays at home with his parents. He reported back to Walker A. F. Base, Roswell, New Mexico, for further training. Airman Adams was employed at Eno Plant until entering service in September, 1952. He completed his basic training at Lackland A. F. Base, San Antonio, Texas.

Baby Clinic

Proximity—Revolution—White Oak

New members to the clinic on Wednesday afternoon were Kathy Jones, of 1204 Walnut Street; Terry Ross, of Route 5; Janet Lewis and Janie Lewis of Route 2, Brown Summit; and Jackie Lynn of Route 2, Brown Summit.

Others present were Shirley Taylor, Jeffrey Seawell, Mary Rhudy, Brenda Rhudy, Linda Clark(Theresa Owens, Richard Scruggs, Randy Wrenn, Robin Lindsay, Patricia Frazier, Charles Apple, Lewis Benjamin Smith, Theresa McDaniel, Vicky Hornady, Jerry Wayne Johnson, Pamda Stanley, Judy Ann Peeden, Cynthia Peeden, Iva Jean Templeton.

ALABAMA GIRL

(Continued from Page 3)

for the pretty Alabama collegienne. Maid Alice is a flying enthusiast, and nearly all of her 65,000 miles of touring will be by air. Though she has traveled considerably throughout the South and East before, Alice has never been abroad or to New York City.

The new cotton ambassadress will find nothing new in public appearances, for as Alabama Maid of Cotton she made an extensive tour to tell her state about its cotton industry. Alice did not have an opportunity to go home before setting out on her tour, but already a royal homecoming welcome is being planned for her when she returns to Birmingham early in February in her official role.

The Maid of Cotton contest and tour are sponsored annually by the National Cotton Council, the Memphis Cotton Carnival, and the Cotton Exchanges of Memphis, New York, and New Orleans.
